

FREEDIVING 2015

DESCRIPTION

Our most popular and all around bifins.
The length of the blade is compatible with dynamic and constant weight apnea.
Composite blades to stock up on maximum energy throughout the bending.

TECHNOLOGY

Technology : prepreg curing process
Fabric : E-glass Resin : epoxy
Performance : 30 to 40% more responsive than plastic
AST

SPECIFICATIONS

Height of blade : 760 mm
Width of blade : 210 mm
Surface area of the pair of blades : 2720 cm²
Flat blade for made-to-measure footpocket (free heel)
Blade with an angle of 15° to fit in full footpocket
4 kinds of varying hardness that are most likely to suit your style and body type :
760B2EG : soft, dynamic apnea
760B3EG : medium, dynamic and constant weight apnea
760B4EG : hard, constant weight
760B5EG : very hard, constant weight for strong men (+ 90kg)
Weight with made-to-measure footpocket = 1,5kg
Weight with full footpocket = 1,9kg
T-shaped sections along the edges to ensure a good drive and a channeling of the water

FOOTPOCKETS

- 3 kinds of footpockets :
- Made-to-measure footpocket : Size 35 to 50 (3 to 15), free heel for better stroke
 - Tuned full footpocket : cut out footpocket to get a lighter and more responsive swimfin.
 - Beuchat Mundial : 41-42, 43-44, 45-46, 47-48
 - Imersion : 38-40, 40-42, 42-44, 44-46
 - Pathos : 36-38, 38-40, 40-42, 42-44, 44-46, 46-48, 48-50
 - Full footpockets screwed on blades reinforced with a special composite :
 - Mares : 39/40, 41/42, 43/44, 45/46, 47/48
 - SEAC : 36/38, 39/40, 41/42, 43/44, 45/46, 47/48

DESCRIPTION

Our most popular and all around bifins.
The length of the blade is compatible with dynamic and constant weight apnea.
Composite blades to stock up on maximum energy throughout the bending.
Better strength and improved resistance to impact and crack propagation thanks to S Glass.

TECHNOLOGY

Technology : prepreg
Fabric : S-glass fibre Resin : epoxy
Performance : 4 to 5% more responsive than E-glass
Elastic limit : 10 to 15 % more strength than E-glass

DESCRIPTION

Our most popular and all around bifins.
The length of the blade is compatible with dynamic and constant weight apnea.
Composite blades to stock up on maximum energy throughout the bending.
Very high thrust thanks to the mechanical properties of our high strength carbon.

TECHNOLOGY

Technology : prepreg
Fabric : high-strength carbon fibre Resin : epoxy
Performance : 15 to 20% more responsive than E-glass
Elastic limit : identical strength than E-glass
AST

SPECIFICATIONS

Height of blade : 760 mm
Width of blade : 210 mm
Surface area of the pair of blades : 2720 cm²
Flat blade for made-to-measure footpocket (free heel)
Blade with an angle of 15° to fit in full footpocket
4 kinds of varying hardness that are most likely to suit your style and body type :
760B2C5 : soft, dynamic apnea
760B3C5 : medium, dynamic and constant weight apnea
760B4C5 : hard, constant weight
760B5C5 : very hard, constant weight for strong men (+ 90kg)
Weight with made-to-measure footpocket = 1,5kg

DESCRIPTION

Our most popular and all around bifins.
The length of the blade is compatible with dynamic and constant apnea.
Composite blades to stock up on maximum energy throughout the bending.
Extraordinary thrust thanks to the mechanical properties of our intermediate modulus carbon.

TECHNOLOGY

Technology : prepreg
Fabric : intermediate modulus carbon fibre Resin : epoxy
Performance : 5 to 6% more responsive than carbon C5
Elastic limit : 4 to 5 % more strength than carbon C5

DESCRIPTION

Our longest stereofins for deep freediving and for competition in dynamic apnea. The propulsion consist of large kicks with a great economy of gesture. Composite blades to stock up on maximum energy throughout the bending.

TECHNOLOGY

Technology : prepreg curing process

Fabric : E-glass Resin : epoxy

Performance : 30 to 40% more responsive than plastic

AST

SPECIFICATIONS

Height of blade : 820 mm

Width of blade : 200 mm

Surface area of the pair of blades : 2880 cm²

Flat blade for made-to-measure footpocket (free heel)

Blade with an angle of 15° to fit in full footpocket

4 kinds of varying hardness that are most likely to suit your style and body type :

820B2EG : soft, dynamic apnea

820B3EG : medium, dynamic and constant weight apnea

DESCRIPTION

Elastomer decoration film hot pressed during the polymerization of the composite blade.
This film can be placed, depending on the options selected, either on the front side (footpocket side) or on the back side (heel side) or on both sides of the blade.

COLORS

white, red, orange, green, blue, yellow, light grey, dark grey, metal grey

USE

Regardless of aesthetics, our decorations are mainly used for safety reasons to be better identified in freediving, spearfishing and finswimming. Freedivers and underwater hunters prefer light colors while the finswimmers choose bright colors.
